Mother's Day Project

**Jay County Jr-Sr High School**

Vocational (DC) Radio/Television, Introduction Digital Media Production

I added this project as part of our introduction to audio production

Audio allows podcasters and television hosts to establish a direct connection with an audience. Audio is just as important if not more important than video. People who work mainly in audio get to enjoy that direct connection with their audience and therefore gain many listeners as opposed to video. When you hear somebody's voice conveying a news report or message a certain way, it's easier for you to connect with it. People are more often grounded with a message when they hear it as opposed to both seeing and hearing it.

ACTIVITY: Soundwave Project:

A production person works with sound every day. This assignment will introduce you to what a visual representation of a sound wave looks like.

EVALUATION: Each student will record and design their own soundwave art card.

Listed are 2 different directions: follow Option one today.

OPTION 1: record using your chromebook. Sign in: Twistedwave.com to record your message. CLICK ON NEW EMPTY FILE TO **RECORD MESSAGE:** click record then square when finished.

SCREENSHOT: take a screenshot of your recorded message soundwave by holding down the: control+shift+switch window key save a new file name/class

IMPORT:Import image to Canva

1.Open canva here: https://www.canva.com/brand/join?token=E_yIwndNzTarvFGkYXq6fA&brandingVariant=edu&referrer=team-invite

2.Type: Mother's Day Photo Books templates 8.5X11 size

3. Choose create blank: drag and drop in space provided

4. Click uploads: upload from device and find your soundwave

5. Drag soundwave to project. Make adjustments as needed.(to enlarge: drag corners)

6. Click Effects top corner then click on background remover. Click restore and zoom in to color to fill in missing areas.

7.click on elements-type flowers add

8. Click title: write in your message and your name.

9. Add any other desired effects. In elements: type borders.

10. click share under my name

EXAMPLE 2:

Step 1: Record a short video message on your phone.

Step 2: email video to your gmail /

Step 3: Upload video to this link:https://convert.ing-now.com/mp3-audio-waveform-graphic-generator/

Step 4: follow instructions to convert your video.

Step5: download and save your new file

Step 6: upload file to this link:https://convert.ing-now.com/mp3-audio-waveform-graphic-generator/options/3d7273e314e0c30b75c6add42e55d373/

Step 7: select color. Select large waveform at 3600x1200 pixels

Step 8: scroll down click OK.

Step 9: right click and save file

Step 10: upload PNG to Doc or Canva

Step 11: edit the image
