The State Policy Seminar being hosted by the IACTE Legislative Committee is an in-person event to be held on February 14, 2023, at the Indiana Government Center from 9-11am.

The Indiana ACTE Legislative Committee is a group of diverse IACTE members with the vision of working with our elected Representatives and Senators with legislation that impacts Career and Technical Education on both the state and national stage.

Our goal is to support our members and equip you with nonpartisan information so that you are confident presenting to our state and national legislators how proposed legislation will positively or negatively impact CTE and students.

This seminar will provide an overview of the bills of interest related to CTE education matters and training on the following topics:

- How a bill, once introduced, progresses through the legislative process
- How to access information concerning bills, such as authors of the bill and where the bill is in the legislative process
- Which bills, or parts of the bill, that we ask legislators to support or consider voting against and why.
- How to best present your concerns to your Representative

In the afternoon of February 14, we will visit our state legislators in their offices. The Legislative Committee will assist in setting these up. During our visits we will present them with our concerns and support of current legislation.

Location details will be shared upon registration of this event.

**COMPLETE THE REGISTRATION FORM NOW!**
